

Proposal 3

To plant a mature native tree, possibly oak or yew, on a grass area indicated below. The tree would be locally sourced and would be managed to prevent it growing unacceptably large. The grass area would be edged with about ½ metre of cobbles to protect it from accidental damage by cars. The tree would have a bench round it, subject to approval on safety grounds. I would also envisage some planting of flowers to brighten up the centre of the village.
